SCIENCE COMMUNICATION WORK SAMPLE

The Science Behind Inflammatory Foods

Selected slides from a live education series I designed, researched, and presented for families at Infinite Health / Healthy Kids, Happy Moms. Each session turned complex science, from gut barrier function to the microbiome's cross-talk with the immune and nervous systems, into clear visuals and practical daily choices.

> *When people understand the why, they are far more likely to build it into their lifestyle.*

Slides shown: series title, The Ripple Effect, Feed the Gut or It Will Feed on You, Influence of GI Function, Diet Solutions, and the full roundtable series list. Presented under my former name, Deborah Allen.

healthy kids happy moms

THE SCIENCE BEHIND INFLAMMATORY FOODS

Gut Inflammation, Systemic Inflammation, Food Components

with Deborah Allen, RPh
Integrative Pharmacist
Infinite Health, PLLC

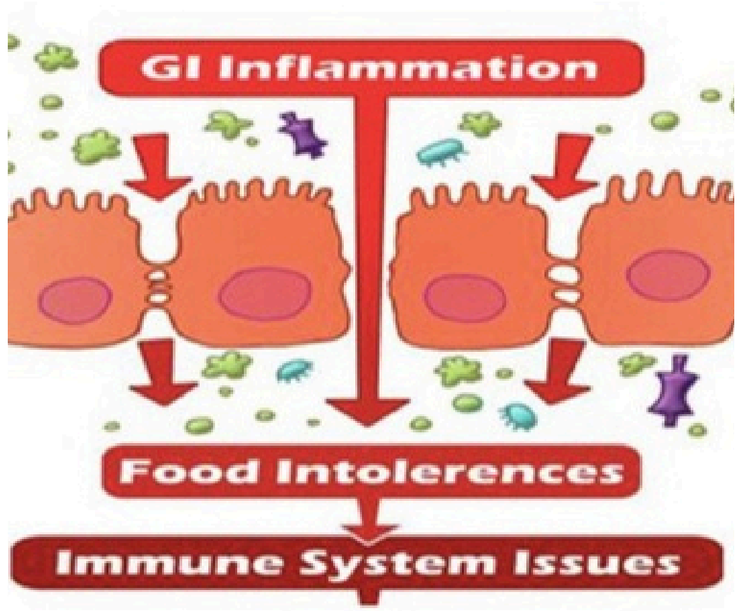

Ripple Effect

Energy expenditure here

- Sleep disturbances, fatigue
- Trouble focusing
- Emotional distress, meltdowns
- Nasal congestion
- Mouth breathing, snoring

Recurrent ear and sinus infections

- Asthma and wheezing
- Skin issues (eczema, bumps)
- Bloating, gas, abdominal pain
- Food intolerances, weight gain
- Constipation or loose stools
- Muscle cramps
- Early fatigue when playing
- Restless leg syndrome, "all over the bed"

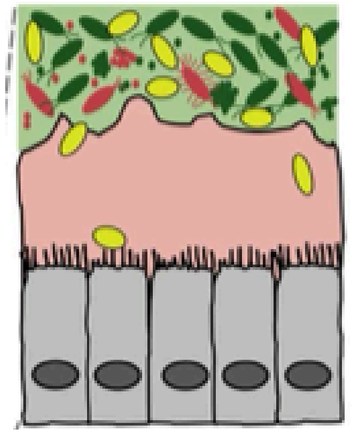

Decreased digestive ability

&

exposure to undigested food proteins

Feed the gut or it will feed on you

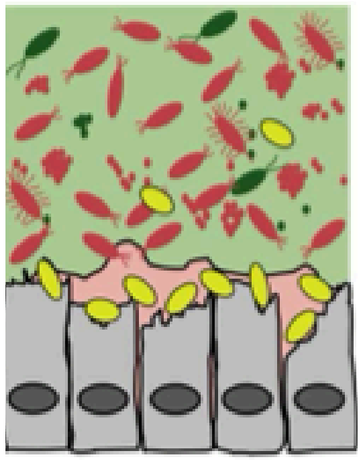

Fiber Rich Diet

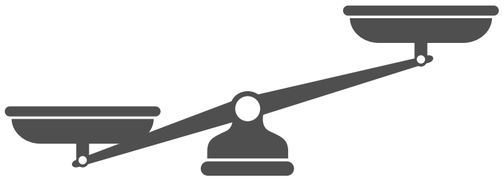

Healthy mucous layer-
Intact barrier function

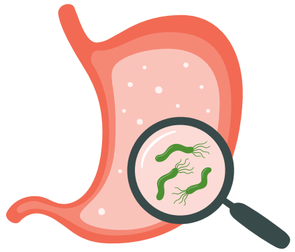

Fiber “Free” Diet

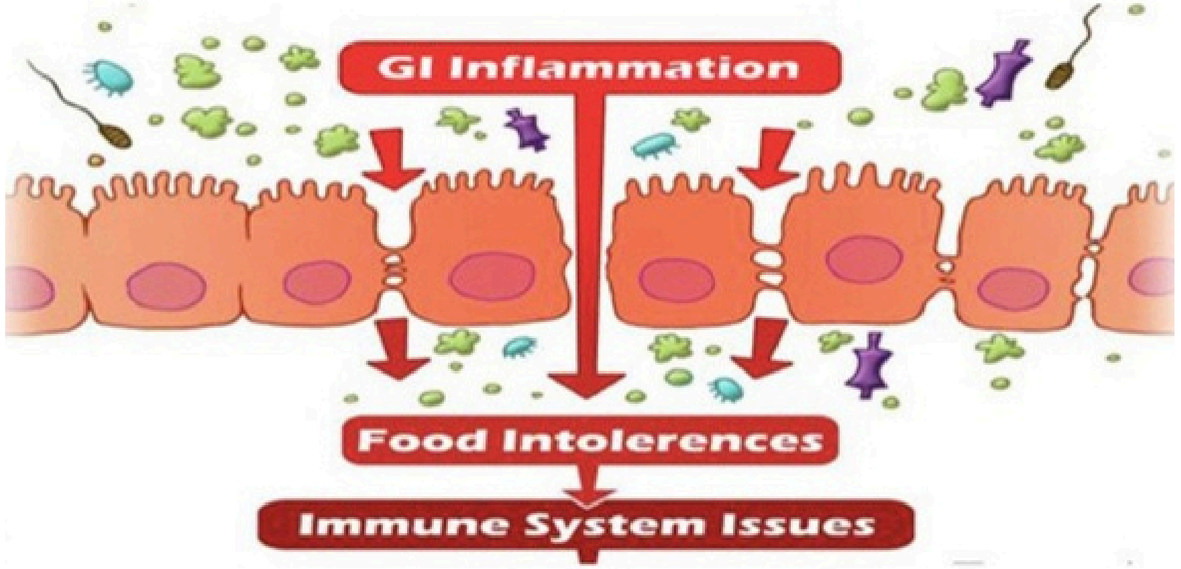

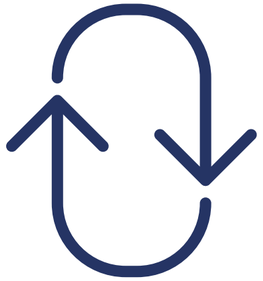

Unfavorable bacteria erodes mucous layer:mucous layer-
Barrier function

Influence of GI Function

"increases the incidence of food allergy by facilitating the passage of intact proteins across the gastric epithelial barrier. This increases the presentation of food antigens, which may cause immune reactions and clinical symptoms of disease"

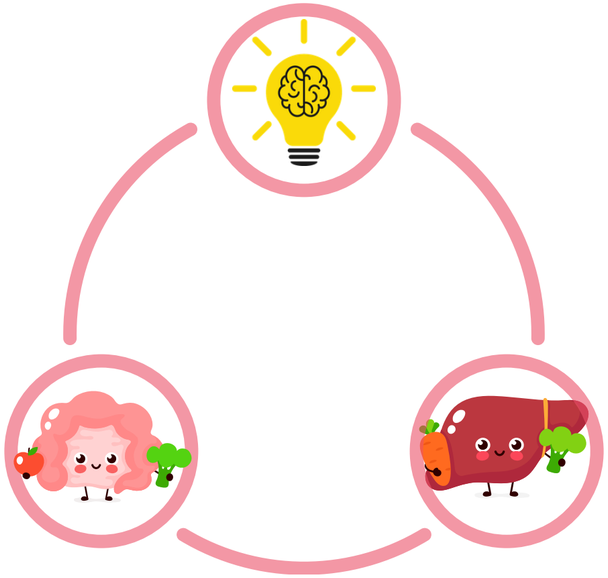

Journal of Pediatric Gastroenterology and Nutrition: January 2002 -

Diet - Solutions

Brain Selective Nutrients

Omega 3s: (including Plant-based) short chain, polyunsaturated fats

- ADHD, Depression, Brain Selective Nutrients

Importance of Fiber in Microbiome Health

Importance of Short Chain Fatty Acids"

Ultra-processed Foods

- Direct cause of 'Leaky Gut"

Diet, Liver and detox

Fructose Reduction
Reduce Sugar load
Reduce Environmental toxins
